

# WAYPURE®

## ELIMINATE RANCID COOLANT ODORS

**WAYPURE®** is an innovative lubricating oil chemistry (way lubricant) designed to optimize **ALL** coolants performance no matter whom the manufacturer.

**THOUSANDS** of customers have experienced the **WAYPURE** advantage in machining centers across North America for more than **20** years!

**WAYPURE®** stops **ODOR** problems like the ones you can have Monday morning in your coolant bath!

**NO ZINC**

**NO PHOSPHORUS**

**No sulfur**

### How can **WAYPURE®** save you **MONEY?**

#### **Extends Coolant Life :**

Less down time for DCR's, Lower disposal costs, lower coolant consumption

#### **Machinability :**

Provides additional lubricity to your coolant increasing your metalworking efficiency, and reinforce corrosion inhibition.

#### **Green :**

**WAYPURE®** is EPA friendly. It doesn't contain conventional extreme pressure additives (heavy metals) such as phosphorus, sulphur, and zinc.

#### **Clean :**

**WAYPURE®** cleans out the build up that conventional oils leave behind in both lines and check valves allowing for better way lubrication and less maintenance.

PROVIDING INNOVATION TO YOUR INDUSTRY

A manufacturer of Stainless Steel food processing equipment in Northern Ohio made the change to **WAYPURE®** about one year ago. This customer, only changing the way lubricant, has extended the soluble oil coolant bath life 2-3 times. The coolant life was extended from

3-4 months to now almost a full year. They are seeing the **WAYPURE®** difference in extended coolant life, lower coolant consumption, less downtime for cleanouts, and low waste disposal costs.

10-year customer Kevin Demott at Black Clawson Converting Machinery made the switch to **WAYPURE®**. Kevin was cleaning both the injectors and check valves on a routine basis prior to using **WAYPURE®**. Since Kevin made the change he has not had any plugged lines, check valves, or injectors.

## HYDRAPURE

**HYDRAPURE** a hydraulic oil derived from similar innovative chemistry as **WAYPURE®**!

**HYDRAPURE** provides same advantages as **WAYPURE** in cases where you have hydraulic oils leaking into your coolant.

### Range : Viscosity available

### These fluids are easy to use.

Just top them off over your present fluid and start to see a difference in just a few short weeks.

Contact your sales representative or local industrial distributor for more information.
